## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1, 3-5, 10-11 and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dedrich et al. in view of Wycech '496.

Dedrich et al. disclose a vehicle door panel including an outer panel, an inner panel and a trim.

Dedrich et al. do not disclose a reinforcement section for the outer panel.

Wycech '496 discloses a reinforcement section 14, 16 positioned on an upper part of the inner surface of the outer panel including an aluminum foil portion 14. Reference Figure 2. This reinforcement inherently functions as a heat insulator and the portion of the outer panel surface without the reinforcement inherently functions as a heat dissipater relative to the reinforcement portion.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the inner surface of the outer panel of Dedrich et al. with a reinforcement as taught by Wycech '496 to enhance the strength of the outer panel.

Re claim 6, Dedrich et al., as modified, do not disclose the exact process by which the aluminum foil is applied.

The product by process limitation of "painting a coating" has been treated as follows. Dedrich et al., as modified, teaches a product that is the same as the claimed product set forth in the product-by-process claim although produced by a different process which is a proper rejection of the claim. See *In re Marosi*, 710 F.2d 799, 218 USPQ 289 (Fed. Cir. 1983) and *In re Thorpe*, 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). See also MPEP § 2113.

3. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 6 above, and further in view of JP2001158306.

Dedrich et al., as modified, discloses the claimed invention except for the aluminum foil layer including aluminum flakes.

The '306 reference discloses the use of a film containing aluminum flakes provided on a surface of an automobile body panel for heat insulation function.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the aluminum foil layer of Dedrich et al., as modified, with aluminum flakes as taught by the '306 reference for an enhanced heat insulation function.

### ***Response to Arguments***

4. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
